

E-Learning

We know it, we do it & **we make our clients feel proud** of it...

Our Profile

HexaLearn is an ISO certified learning & software solutions company based out of India. Our organization was built with the belief that with the years of experience we have and our passion for partnering growth, we would be the preferred choice for clients across the globe. We do not believe in limitations & restrictions, instead what we believe in is the drive to succeed and deliver the best within those limitations. Nothing in this world is painted the way you want it... but fortunately we have built a team & have the technical competency to paint it your way!

Our mission is to help our clients improve operational efficiency, drive down costs and effectively market & grow their business through state-of-the-art learning & development.

DATA/CONTENT SECURITY

- The very first step in our engagement process is to sign an NDA (Non-Disclosure Agreement).
- As an ISO 9001:2015 and ISO/IEC 27001:2013 certified organization, our data security measures are audited on a regular basis.
- All project materials/assets should be shared through a web file sharing application. Every detail of the upload/download/edit, etc. is maintained automatically. The file details can be reviewed anytime anywhere by the authenticated users of the application.
- On project completion, if there is a requirement to back-up the files for a specific period then HexaLearn will do so at a minimal charge. If there is a need to delete/destroy the files then HexaLearn will do a screen capture video when the deletion is in progress. And the screen capture video would be shared with the client team.
